

LIVELY CHASE AFTER FUGITIVE

**A Locomotive Is Pressed Into Service
By The Sheriff's Force But Fast
Footwork Finally Results In Landing
Wanted Man Behind the Bars.**

(From Saturday's Daily.)
Yesterday morning about 11 o'clock a man giving the name of Henry Habitch furnished some amusement to the residents of the western part of the city in an effort to escape the clutches of Sheriff Lowry, leading the officer as well as deputy sheriff Horace Bowdre a lively chase before surrendering.

It appears that in the early part of the forenoon the sheriff's office was given a warrant for the arrest of the man on a misdemeanor charge, the specific nature of which was not divulged, when a diligent search was at once commenced in an effort to locate the much wanted man.

A railroad engine was pressed into service, conveying deputy sheriff Merritt to Granite Dells, where after a careful search the chase in that direction was abandoned. In the meantime Sheriff Lowry and deputy Bowdre who were keeping a sharp lookout in the confines of the city, had almost reached the conclusion that Habitch had left the city in another direction, deputy Bowdre at once proceeding to the Lowry place in West Prescott to secure mounts for himself and the sheriff to reconnoitre the surrounding country.

Proceeding in the direction of his home, a short distance behind deputy Bowdre, the sheriff came within hailing distance of the fugitive near the Granite creek bridge on West Gurley street. A command to halt only served to increase the already rapid gait of the fleeing man. The chase was continued west on Gurley to the corner of Summit, when J. C. Snow, who was coming east, at the request of the sheriff, started to apprehend Habitch, quickly giving up the attempt, when the fugitive threw open his coat, exposing a Colt's revolver, which, however, he made no move to use. Continuing north on Summit street, and outfooting the sheriff, he halted when he espied deputy Bowdre bearing down in his direction with a flank movement that appeared certain to result in capture. He seated himself under a friendly shade tree, and waited the arrival of the officers to whom he quietly surrendered.

Scarcely had Habitch been safely lodged behind the bars in the county jail when a telephone message from the railroad depot informed the officers that the peace and quietude of that busy locality was being disturbed by a man in a fighting state of intoxication.

Hurriedly making his way to the railroad station, the inebriate was placed under arrest by deputy Bowdre, who urged him in the direction of the courthouse. No warlike demonstrations were made by the arrested man until the Lawler block was reached, where in front of the Dillon cigar

store the man refused to proceed further, showing fight to the officer. After a lively tussle, deputy Bowdre with the aid of three other men loaded the captive in an express wagon, in which the deputy held him until the jail was reached, when under sheriff Neagle and jailer McConnell took the prisoner in charge, and despite his strenuous efforts to escape, pushed him into the cooler.

His case will be disposed of by justice of the peace Keohane today.

COPPER MARKET IS HOLDING STRONG

**Present High Price Is
Justified By The
Demand**

**Producers Generally Are
Sold Far
Ahead**

Copper holds strong at the ruling prices of last week. Lake is held at 18 1/2 to 19 cents per pound, electrolytic 18 to 18 1/2 cents. There has been inquiry for some large sized lots of copper for nearly delivery, but, as a rule, consumers have contracted for their supplies well ahead, and producers generally are sold ahead for several months, says George L. Walker in the Boston Commercial.

The consumption of copper in building materials is very heavy. The uses of the metal in this direction are growing very rapidly.

Notwithstanding the fact that the American Telephone and Telegraph company has been enabled to effect a great saving of copper through the application of the Pupin coil on its long distance lines, the coil being placed at intervals along the system, and permitting the use of a much lighter wire than formerly, the company is having some difficulty in getting wire enough to keep pace with the demands for increased long distance service. The engineering department of the com-

pany is taxed to its utmost capacity in building new trunk lines, and adding additional capacity to those now existing.

A gentleman in close touch with the affairs of the company says: "The growth of the telephone service in the south and west is simply amazing."

The telegraph companies have also been very active in replacing and building up their long distance wires.

A gentleman who has had many years of experience in the copper metal trade says: "Conditions in the metal trade are most satisfactory and the most prosperous that I have ever seen. The current consumption of copper is enormous, and the indications are that it will continue so for some time. There are no stocks of copper anywhere, nor is there any evidence of hidden stores."

"The present high price for copper is fully justified by the great demand for the metal. I do not look for a recession in prices for some time to come. However, in prices would be a cause for regret if prices were forced above the present level."

"There is some speculation in the metal on the other side, but there is very little, if any, in the American market, and it would be almost impossible under the conditions now existing in this country. The metal reaches the consumer now through comparatively few channels, and they are exercising great care to prevent speculation by selling to consumers only. In our own case we are kept busy supplying the demands of regular customers. Our shipment contract contains the clause 'not transferable.'"

"There can be no doubt that there is a shortage of copper, but I would like to see the price of the metal kept with present bounds. Producers are making splendid profits on their copper. From the producers' standpoint, everybody is and ought to be satisfied with the present selling prices. Higher prices would certainly curb consumption, and although the trend of the market appears to be upward, I am quite satisfied with the present conditions."

The foregoing generally reflects an evident desire on the part of producers to prevent, if possible, a further decided rise in the price of the metal.

All the conditions are favorable for higher prices for the copper stocks. Never in the history of the industry have conditions been more encouraging. Furthermore, the technical market situation is entirely sound. There are no light-weighted margin accounts to be thrown over whenever the market breaks. There are no big speculative holdings ready to be sold whenever prices advance a few points. A larger percentage of coppers than ever before is held permanently.

That some interests are using their influence to hold the coppers back for personal profit cannot be doubted. It is questioned whether these interests are keeping prices down in order to purchase the coppers for future developments, or are holding them back in order to facilitate covering of shorts, contracts foolishly made at lower prices.

Death from Lockjaw.

never follows an injury dressed with Bucklen's Arnica Salve. Its antiseptic and healing properties prevent blood poisoning. Charles Oswald, merchant, of Remmelersville, N. Y., writes: "It cured Seth Burch, of this place, of the ugliest sore on his neck I ever saw." Cures cuts, wounds, burns and sores. 25c at all druggists.

EMPLOYERS ARE LIABLE FOR INJURIES

WASHINGTON, June 1—The senate today passed the bill regulating the liability of railroad companies for injury to employees, but Daniel gave notice of a motion to reconsider, which, if it prevails, will have the effect of again bringing the question before the senate for consideration.

The remaining time of the open session was devoted to the speech of Moran in support of the assertion of American control on the Isle of Pines, and the discussion of a resolution prescribing the policy of the government in the purchase of supplies for the Panama canal. Stone opposed the amendment as useless, and attacked the President as weak and wavering in policy. After a protracted discussion the executive session adjourned.

E. Fleming L'Engle, ore buyer for the Arizona Smelting Company, is paying a business visit to the mining camps in the Crook Canyon and adjoining districts.

TITLE PASSES TO THE RICHINBAR COMPANY

**E. S. Campbell To Be
Paid \$5,000 Out Of
Earnings**

**Big Power Plant Is To
Be Installed
Soon**

(From Saturday's Daily.)

The Richinbar Mines company on Wednesday made the final payment on the purchase price of the Gold Note group of mines, the title to the property passing from the estate of the late George Zika, to E. S. Campbell. The consideration of the deal was \$50,000, in addition to \$5,000 which is still due and owing to Mr. Campbell, who secured an option of purchase on the mines from George Zika, a short time before his death.

The deed transferring the title was filed in the recorder's office as well as an assignment from Mr. Campbell to the Richinbar Mines company, of his remaining interests, the company agreeing to pay him the \$5,000 due out of the net earnings of the property with no definite time provided, his deed to the property being held in escrow in the Bank of Arizona until the final payment is made.

The Gold Note group of mines, situated at Richinbar on the Agua Fria river about 20 miles south of Mayer, constitutes but a part of the holdings of the Richinbar Mines company, which in the past year has expended an enormous amount of money in the development of its properties and the installation of large and costly machinery. The mines were established in the producing class some months ago when in the latter part of the month of April the power plant on the Agua Fria river was entirely destroyed by fire.

Plans are now under contemplation for the installation of a power plant of much greater capacity than the one destroyed and for the running of a tunnel from the bank of the river to tap the vein at a great depth.

By the time the tunnel reaches the vein in which there are large bodies of high grade ore blocked out in the upper levels, the company expects to have a reduction plant of great capacity installed below the mouth of the opening in which the ores can be unloaded by the gravity system for treatment.

The property is considered by mining engineers to be among the most promising in the northern part of the territory.

PUBLIC RECORDS.

Instruments Filed As Reported by the Prescott Title Company.

Geo. H. Francis files bond of \$1000 as justice of the peace, Upper Agua Fria district.

T. J. Morrison files bond of \$1000 as road overseer, dist. No. 47.

J. O'Hara locates Reward mine, Back Canyon district.

Thos. Maxwell locates three mines, Hass district.

Chas. Thompson files off of a work on 12 mines, Black Rock district, Castle creek, and Humburg districts.

Pennsylvania and Cananea Copper Co. amends articles of incorporation.

James R. Boyer and wife to Climax Mining Co., m. deed, \$650; mines, Cherry creek dist.

B. F. Switzer and A. L. Hammond incorporate Black Mountain Copper Co., capital stock, \$1,000,000.

B. F. Thomas files off of a work on J. E. McCoy files off as to melted and mutilated coin found in San Francisco.

M. Pechan and W. C. Schultz locate Florentine group mill site and water right, White Picacho district.

John Thomas locates Anna Roney mine, Tiger district.

John Sims and John Thomas locate Two Johns mine, Tiger district.

New England-Arizona Gold and Copper Mining company amends location of Red Star mine, B. B. district.

Dennis J. Marr, deceased, turning over all property from terms of will to executors.

John Spruance and Chas. W. Fore to D. E. Daves, lease, part of Red Rock mine, Big Bug district, term of 18 months.

E. J. Boblett et al locate two placer claims, Walker district.

North Verde Copper company locates three mines, Verde district.

Stefano Loncar locates Jackson Beauty mine, Walker district.

E. M. Albertson et al locate Speckled mine, Blue Tank district.

J. R. Boyer et al locate two mines, Cherry creek district.

W. C. Denny to Chas. Allen, w. deed, \$650; N. hf. and SE qr. of NE qr., sec. 25, 18 N., 6 W.

Marcia W. Payne, Chas. A., Alva T., and James E. Wing, to Thos. Wing, q. c. deed, SE qr. sec. 12, 14 N., 2 W.

Thos. Wing, to Marcia A. Payne, w. deed, \$1; same property.

F. M. Murphy and Marie Kuhne, to M. J. Whelan, option, \$10,000, 1 year, Mark Twain and 86 mines, Walker dist.

M. J. Whelan to St. Anthony M. and M. Co., assignment, assigns above option.

Chas. T. Joslin et al incorporate Prescott Stock Exchange Publishing Co.; capital stock, \$15,000.

J. A. Oldham and J. F. Waldrup file articles of copartnership as Oldham & Waldrup.

Jake Marks and Sarah A. Fisher, to Ida F. Miller, m. deed, Lucky Boy mine, Hass dist.

Estate Geo. Zika, deceased, to Ed. S. Campbell, m. deed, \$41,000; patented mines, Black Canyon district.

Ed. S. Campbell to Richinbar Mines Co., assignment, \$55,000; assigns contract to purchase above mines.

A. J. Carroll and Willis B. Troy incorporate Carroll Gold and Copper Co., capital stock, \$1,500,000.

E. B. Corthell locates Moonshine mine, Weaver dist.

O. B. Stanton and E. J. White incorporate Consolidated Copper Creek Mining Co., capital stock,

James Drum to Geo. W. Mardis, power of atty., grants powers concerning Boyd group of mines, Castle creek dist.

C. W. Brooks and W. M. Owens locate 9 mines, Castle creek dist.

Ben Rybon locates Grand Mountain mine, Big Bug dist.

Jennie Crapo to Alice Robinson, w. deed, lot 9, block 3, Fleury add, Prescott.

White Horse Mg. Co., to L. C. Haynes power of atty., power to contract for, etc., Fuller group of mines.

D. N. Bartholdi to White Horse Mg. Co., option, \$15,000; 16 mos.; Fuller group of mines, Squaw creek dist.

Wm. Lawler and wife to John Lawler, m. deed, Eureka mine and mill site, Eureka dist.

Frank Mantey and W. M. Brock locate four mines, Castle creek dist.

WEATHER BULLETIN.

Report for the Week Ending May 28.

The temperature during the week decreased slowly until Friday. There was a slow increase on Saturday and Sunday. The night temperatures were exceedingly low, ranging from 31 degrees to 44 degrees over the northern counties; from 42 degrees to 54 degrees over the central counties, and from 48 degrees to 56 degrees over the southern counties.

The weather during the middle of the week was threatening and stormy, with thundershowers scattered over large areas within the central and southern sections and light rain turning into light snow over the northern section and the Mount Graham range. Hailstorms and sandstorms occurred over the central counties on the 23d. The winds blew strongly over the entire territory on Wednesday, attaining velocities of 26 to 32 miles per hour, from the southwest, west and northwest.

There was just sufficient precipitation over the upper drainage areas of the Salt and Gila water sheds on the 23d to cause a small run off and a slight rise, which discolored the waters of those streams. At the end of the week the water became clear and the streams were receding at a rapid rate. The Little Colorado and Colorado remain at flood stages. The snowfall of the 23d over the Mt. Graham mountains has almost disappeared although the higher peaks of that range are still snowcapped. It is estimated that there are some 10 to 60 inches of snow remaining over the mountains within the northern section of the territory.

Stock water upon the more isolated sections and ranges is becoming scarce; otherwise, there is a bountiful supply of water. The acreage irrigated during the past week was nearly twice the area of that under irrigation at the corresponding date of last year. Water service continued far beyond the scheduled runs.

Yavapai County.

Columbia—Wednesday, Thursday and Friday were partly cloudy, but only a sprinkle of rain occurred. The middle of the week was cold; rising temperature on Friday and Saturday.

GOLD HILL GROUP HAS CHANGED HANDS

**E. L. Rodgers Sells To
P. A. Simons And
Associates**

**Property Is Situate In
Silver Mountain
District**

(From Saturday's Daily.)

An important mining deal was consummated yesterday when P. A. Simons and his associates assumed control of the Gold Hill group of mines in the Silver Mountain district. The consideration of the transfer, part of which involved a cash payment, was not made public, but is known to be a large amount.

The group, consisting of four claims and a millsite, was located about six years ago by E. L. Rodgers, who built an arastra on the ground, in which he treated the high grade free gold ores found in the surface workings of the vein, using the proceeds for the further development of the property.

Besides a number of shallow shafts and tunnels on the ground, the vein is opened by a shaft 130 feet in depth in which there is a 14 inch streak of ore which samples on the average \$50 to the ton, in gold, copper and silver. In addition to this shaft the ledge is exposed in a tunnel following the vein a distance of 200 feet showing the ore deposit to be similar in size and value to that found in the shaft.

Two drifts are being run from the shaft for the purpose of exploring this chute of ore and a large force of men will be at once employed in other development work, the plan of which is now under consideration by the new owners.

The camp is situated in the heart of the Bradshaw mountains, about 14 miles in a southwesterly direction from Crown King, the nearest railroad station, and about one mile and a half from the camp of the Oro Mining and Milling company, in the Minnehaha section.

MUST GO THE ROUTE.

Attorney Leroy Anderson, who represented C. C. Leigh, who was convicted of murder in the first degree in the Mohave county district court some months ago, yesterday received a communication from Governor Kibbey, refusing executive clemency to the convicted man.

Leigh will be sentenced at the next term of the Mohave county court.

The range is steadily drying up. Rain is much needed.—M. J. Nolan.

Prescott—Low temperatures prevailed all the week, and high winds were of daily occurrence. The water supply is decreasing slightly. Crop growth was checked by cold weather. General conditions satisfactory.—W. E. Day, M. D.
